# 1. About ATS

Advanced Technical Solutions (ATS) welcomes you to a new partnership where technology products and services raise your business performance levels. Combining outstanding products with customer-focused services, ATS sets the standard for telecom system integration, infrastructure, networks and communications solutions.

## 1.1. Mission

Match customer requirements with the best and most suitable solutions, leveraging technologies for customer value with outstanding pre-sales, implementation and long-term support.

## 1.2. Vision

Ensure public and private sector organizations' business and operational continuity, connectivity and security.

## 1.3. General Information

Company Details	
Company Name:	Advanced Technical Solutions LLC
Mail Address:	PO Box 37139, Abu Dhabi, United Arab Emirates
Location:	Tower A, Apartment No. 2403, Electra St. Abu Dhabi, United Arab Emirates

## 1.4. Main Activities

Solutions	Services and Capabilities
Access Control and Management System	System Integration
Audio Visual System	Detailed Engineering and Design
Closed Circuit Television System (CCTV)	Installation and Commissioning
Fiber Optic Based Networks	Integrated Factory Acceptance Testing
LAN/WAN System	Maintenance and Support
Public Address and General Alarms Systems	Procurement
Telephone System (PABX/VoIP)	Project Management
Voice and Data Structured Cabling	Training
Cyber Security	
Hybrid IT Solutions	

## 2. Capabilities

### 2.1. ATS Model

Customers drive our choice of vendors, products and implementation methods. ATS sources, evaluates, designs, implements and ensures that solutions continue to deliver value, the way the customer wants.

---

ATS: a vendor-independent telecommunication systems integrator where customers are first.

---

### 2.2. Core Competencies

Core competencies are primarily the following:

Services with a highly qualified and experienced team in the following areas:

- Detailed engineering and design
- Installation and commissioning
- Integrated factory acceptance testing
- Maintenance and support
- Procurement
- Project management
- System integration
- Training

A corporate partner over the full project life cycle.

Enables customers to be more competitive in the market

## **2.3. Areas of Specialization**

### **2.3.1. System Integration**

ATS delivers complete, multi-system, integrated, turnkey telecoms and security packages for oil and gas projects, both onshore and offshore. This ensures that you have integrated solutions that work reliably in harsh and hazardous environments.

### **2.3.2. Detailed Engineering and Design**

ATS' consulting division has talented professionals, the latest tools, and access to key resources.

Engineers handle technical queries to ensure that proposed engineering complies with client requirements and presents alternative solutions, where they will be useful.

Wiring diagrams and layouts are prepared to the level specified by the client, and are submitted for approval.

### **2.3.3. Procurement**

With ATS procurement, criteria for selection, approval and monitoring of supplier performance are established in tenders.

Our knowledge of best-in-market suppliers enables us to source best value vendors and products. To reduce cost and risk, we rely on established telecom industry standards and use a multi-vendor approach.

### **2.3.4. Project Management**

Building and installing

Testing

Commissioning

Consultancy services for all data and telecommunications requirements

Pre-installation site surveys

Site preparation

Network upgrade advice

Detailed component requirements and specifications to establish project budgets and guide procurement

Full project management facilities

Vendor and component selection

### **2.3.5. Installation and Commissioning**

Our technicians work alongside project managers and engineers to ensure smooth and efficient installation. All works are carried out in accordance with client specifications.

Alternatively, we can witness third party testing on your behalf.

Prior to commencement of commissioning, ATS requires power to system panels and associated items; we conduct general inspection and visual checks of installed equipment, cables and wiring, including setup, configuration and interconnections.

### **2.3.6. Integrated Factory Acceptance Testing**

ATS integrated factory acceptance test (IFAT) brings together selected vendor components and client personnel to validate and test of subsets of control systems networks and/or security applications, at a single place – the ATS Integration Center.

With IFAT, ATS ensures important benefits, including time and cost savings, improved compliance and increased comfort levels with integrated systems and solutions.

ATS Integration Center is your one-stop resource facility for solutions integrations and assurance. The Center supports the delivery of comprehensive solutions and integration services with limited time and resources.

ATS Integration Center is registered and certified to ISO 9001:2008; ISO 14001:2004; OHSAS 18001:2007 standards. Highly-secured, with an area of 1,600 square feet, the Center offers state-of-the-art technology and is strategically located in Abu Dhabi island. The Center helps organizations reduce TCO (total cost of ownership), resolve operational, resource and related issues that require technology integration support.

Our team of certified project managers and engineers understand the special requirements of the oil and gas industry and government sectors, so they can successfully execute integration project roll-outs, from the simplest to most complex. Trusted outcomes are delivered on time and in budget.

### **2.3.7. Maintenance and Support**

To ensure that you continue to benefit from our products and solutions, we provide routine and emergency maintenance through service level agreements.

Our customers have manufacturers' warranties on products and solutions, and we assist in following up warranty-related enquiries.

Our technical teams are on duty 24/7 for emergency call-outs and repairs. Technical support includes:

- Audits

- Tests and reports

- Planned maintenance

- Traffic monitoring

Security testing

Network and system optimisation

### 2.3.8. Training

We train customer engineers and technicians as part of our solution and service packages. When a system or solution is commissioned, your technical teams will be fully capable of managing and trouble shooting.

## 2.4. Quality and HSE Management

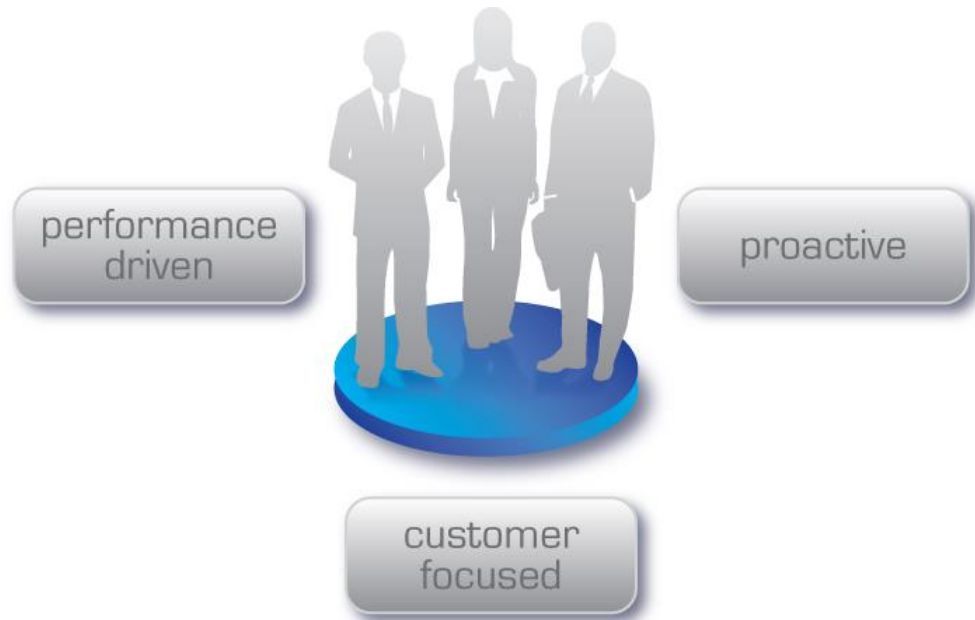

With the ISO-certified Integrated Management System (IMS), ATS sets new standards for quality control.

## 3. Resources and Facilities

### 3.1. The ATS Team

ATS' managers have a hands-on approach. As a result, top managers are involved in every project from initial appraisals through to commissioning and warranty support.

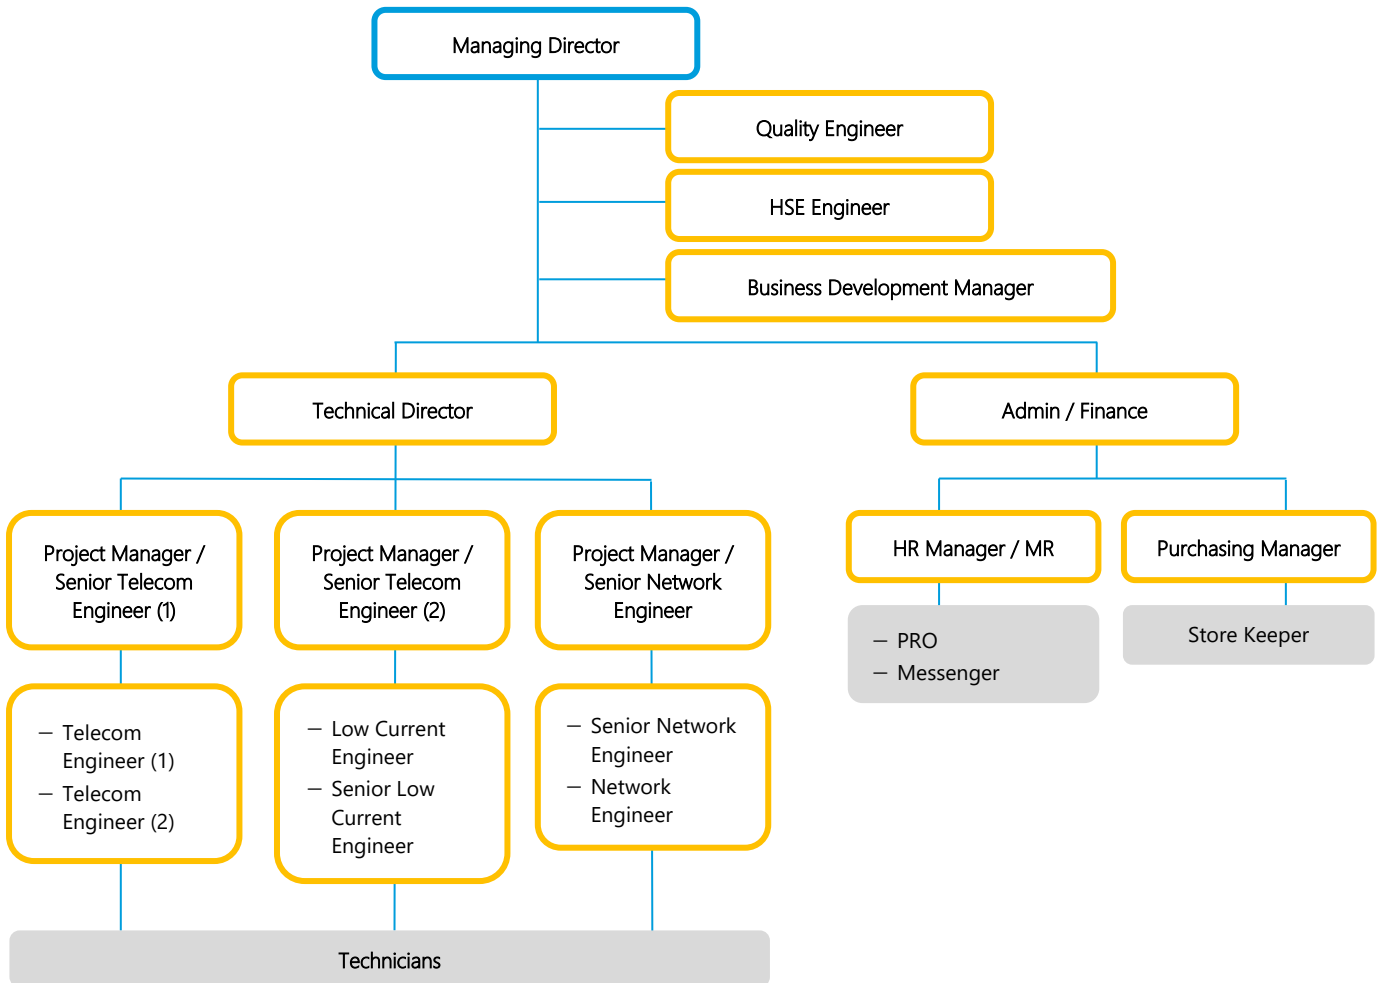

ATS' team members hold up-to-date certification from leading vendors, and all team members are actively involved in self-development. Through regular training and vendor certification, we ensure that the workforce is trained in:

- Project management
- Quality assurance
- Customer relations management
- Supply chain and vendor management

See Tab 2: Key Personnel and CVs to find more on ATS key personnel and technical CVs.

### 3.2. ATS: Organization Charts

## Management Organization Chart

## 4. Accreditations, Prequalification, Licenses and Registrations

### 4.1. Accreditation

ATS works in multidisciplinary teams, supported by a wide range of certifications.

ATS has been assessed for trading, installation and maintenance of IT and telecommunication infrastructure for all government and non-government bodies including oil and gas field industries, and has been certified as complying with the following standards:

ISO 9001:2015

ISO 14001:2015

OHSAS 18001:2007
