

Cisco EnergyWise Suite

New and Improved

The Cisco EnergyWise™ Suite helps you see where and how much energy is being used. Automated features show energy used, wasted, and saved for every device connected to the network across the entire enterprise. Agentless deployment makes it fast and easy to implement. Now you can measure usage. Adjust power to meet actual demands. And start seeing savings in days, not weeks or months. Cisco EnergyWise Suite keeps data centers running efficiently while cutting energy costs.

Snapshot of Your Energy Use

Rising energy costs increase expenses, so you have less money for critical enterprise projects. You can't invest in additional capacity because of energy constraints. Without a way to see your energy use, it is difficult to improve your situation.

JouleX Brings New Features to Cisco EnergyWise

JouleX Energy Manager (JEM) software, acquired with the Cisco purchase of JouleX, brings powerful, yet easy-to-use management capabilities to the Cisco EnergyWise Suite. Now you can manage all your network-connected devices — including desktop and laptop systems, IP phones, printers, monitors, and data center equipment, including physical and virtual servers — not just Cisco® devices. And you can capture the full power of the Cisco EnergyWise protocols built into your routers and switches.

Cisco EnergyWise Discovery and Optimization Service

The Cisco EnergyWise Discovery Service helps you figure out how you're managing energy usage today. You can start with this service or with the Cisco EnergyWise Optimization Service, which helps you deploy Cisco EnergyWise offerings and optimize them to the specific needs of your business.

ADVANCED TECHNICAL SOLUTIONS

Cisco EnergyWise Management Software for Distributed Offices and Data Center

Cisco EnergyWise Management Software makes it easy to see, measure, and manage energy use for all network-connected devices. The software comes in two versions: for distributed office environments and for data center use. With Cisco EnergyWise Management Software, there are no device agents or hardware meters to install.

Cisco EnergyWise Cloud

Use this software-as-a-service (SaaS) application to manage energy without hosting the Cisco EnergyWise application in your data center. Reduce energy usage and gain complete visibility without having to purchase, provision, or maintain expensive servers. Pay as you grow, with convenient one-, three-, or five-year subscriptions.

Cisco EnergyWise Suite Benefits

- **Increase office and data center energy efficiency:** See actual energy consumption, instead of relying on faceplate data.
- **Reduce operating expenses by cutting IT energy costs:** Reduce IT-related energy costs by as much as 35 percent with this innovative energy management suite of tools and services.
- **Reduce IT cost of ownership:** Save up to \$50/port/year for networking equipment.
- **Accelerate return on investment (ROI):** Cisco EnergyWise Suite, EnergyWise Discovery Service, and EnergyWise Optimization Service help you get ROI right away. There's no software, so it's fast to implement. Our Cisco EnergyWise Optimization Service help you determine exactly what you need with an ROI plan to help you obtain funding.
- **Gain resiliency:** The Cisco EnergyWise Cloud Service helps increase the solution resiliency. With cloud hosting from Cisco, you get a high-availability service and service level agreements (SLAs). You don't have to build a high-availability on premise system.
- **Pay for what you use:** Cisco EnergyWise Cloud Service gives you better budget predictability. You can pay per quarter based on the number of devices being managed by Cisco EnergyWise capabilities. You'll know your exact cost per period and gain energy savings at the same time.

ATS Services

As a Cisco partner, ATS provides a broad portfolio of smart, personalized services and support that can help you achieve the full business value of your Cisco TelePresence investment by increasing business agility and network availability. This portfolio of services accelerates business innovation by harnessing the network as a powerful business platform.
