ATS

TELECOM
SYSTEM INTEGRATION

Guarantee the seamless continuity, connectivity, and security of business and operational activities for organizations in both the public and private sectors.

OUR MISSION

At ATS, we align customer needs with the most effective and tailored solutions, utilizing innovative technologies to enhance value, while providing exceptional pre-sales guidance, seamless implementation, and ongoing support.

We support our clients throughout their journey in the evolving digital landscape, delivering cutting-edge solutions that foster growth, innovation, and technological advancement.

TABLE OF CONTENT

ABOUT US

At ATS, we specialize in integrating advanced technology, innovative products, and tailored services to help organizations enhance performance, efficiency, and resilience in an ever-evolving digital landscape.

With deep expertise in telecom and cybersecurity, we deliver customized solutions for critical sectors including energy, defence, and government. From designing and upgrading complex telecom infrastructures to implementing robust cybersecurity strategies, we ensure our clients stay secure, connected, and ahead of the curve.

Backed by years of experience and a commitment to excellence, ATS is a trusted partner for organizations looking to safeguard their assets and achieve their strategic goals through smart, secure, and scalable solutions.

+20 YEAR
OF REGIONAL EXPERIENCE

HISTORY

A Journey of Innovation and Excellence

2003
ATS was founded with a bold vision: to become a leading **ICT system integrator in the UAE**, setting new standards in technology and service excellence.

2006
A year of major breakthroughs! ATS secured prequalification as a contractor/vendor for ADNOC, earning its first offshore project and setting the stage for long-term industry leadership.

2008
Expanding its portfolio, ATS introduced CCTV, access control, and audio-visual systems, reinforcing its position as a comprehensive telecom system integrator with cutting-edge solutions.

2010
Achieving prestigious certifications, ATS solidified its commitment to quality and operational excellence:
- **ISO 9001:2008**
- **ISO 14001:2004**
- **OHSAS 18001:2007**

2012
ATS reached a major milestone by acquiring **Cisco Gold partnership**, enhancing its global networking expertise.

2014
Entering the cybersecurity realm, ATS launched its ICS Cyber Security division, spearheading ADNOC's digitalization initiatives and strengthening its capabilities in industrial control system security.

2016
Further raising the bar, ATS upgraded its credentials with internationally recognized certifications:
- **ISO 9001:2015**
- **ISO 14001:2015**
- **OHSAS 18001:2007**
- **ISO/IEC 27001:2013**

2018
ATS's OT cybersecurity division became the first in the region with full in-house system integration capabilities, leading the industry in operational technology security.

2020
ATS took a strategic leap forward by establishing a complete in-house engineering division catering to both Telecom and OT cybersecurity solutions.

2022
A defining moment in ATS's regional expansion! Breaking new ground in Saudi Arabia, ATS strengthened its presence in the GCC market, reinforcing its commitment to innovation and client service across the region.

2024
ATS expanded its focus into renewable energy and utilities, securing prequalification and establishing a strong footprint in this fast-growing sector

INDUSTRIES

ATS partners with critical sectors including energy, defense, government, and transportation, providing tailored OT cybersecurity and telecom solutions.
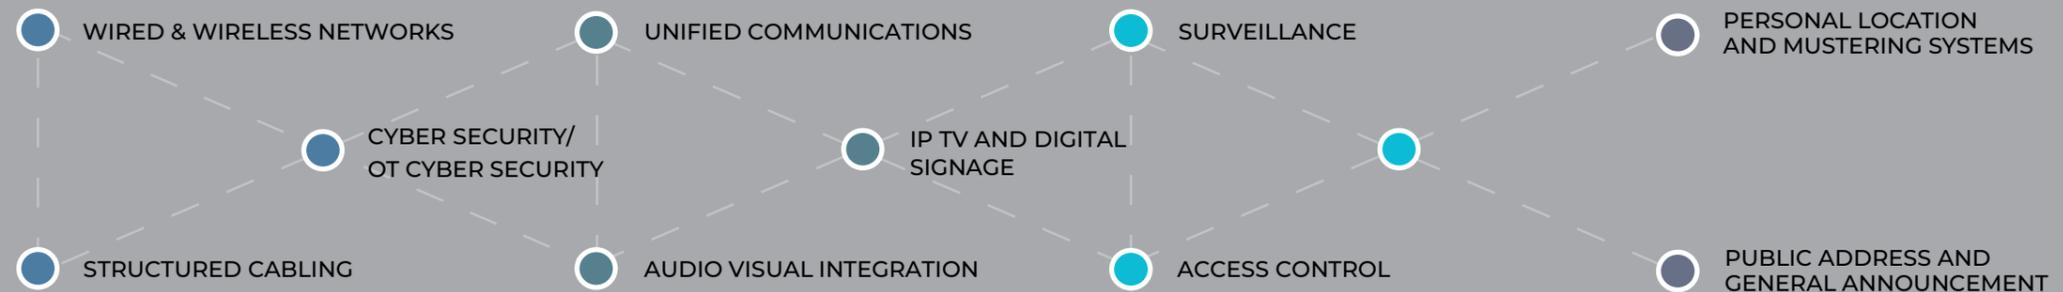

Our specialized services strengthen operational continuity, enhance infrastructure resilience, and support the evolving needs of industries driving today's connected world.

- **Energy & Power Utilities**

- **Oil & Gas**

- **Manufacturing & Industrial Automation**

- **Government & Defense**

- **Critical Infrastructure**

- **Public Infrastructure & Digital Transformation**

- **Telecommunications**

Solutions

- WIRED & WIRELESS NETWORKS
- UNIFIED COMMUNICATIONS
- SURVEILLANCE
- PERSONAL LOCATION AND MUSTERING SYSTEMS
- CYBER SECURITY/ OT CYBER SECURITY
- IP TV AND DIGITAL SIGNAGE
- STRUCTURED CABLING
- AUDIO VISUAL INTEGRATION
- ACCESS CONTROL
- PUBLIC ADDRESS AND GENERAL ANNOUNCEMENT

EXPERTISE

Providing top-tier solutions and services tailored to meet the unique needs of various sectors and industries.

ENGINEERING AND DESIGN

Providing a team of experts, engineers, and talented professionals with many years of experience in engineering and design for the industries and sectors that we serve.
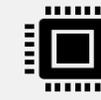

INSTALLATION & COMMISSIONING

We understand that successful project execution depends heavily on the quality of installation and commissioning. That's why we assign only the most experienced and highly qualified technicians to support these critical stages.

SYSTEM INTEGRATION

Our integeration center is centralized hub for seamless solution integration and assurance, with a dedlicated team of certified project managers and experienced technicians.

TRAINING AND EDUCATION

Empowering our clients with knowledge is key to project success. That's why we ensure all client teams receive the necessary training and education throughout every stage of the project.

MAINTENANCE & SUPPORT

Standing by the quality of our work and the reliability of the products we deliver. All our solutions are backed by manufacturers' warranties, and our team is always ready to assist clients with any warranty-related inquiries or follow-ups.

ADVISORY & CONSULTANCY

Project Management & Client Innovation Centre (CIC)
Each project is managed by a dedicated project manager who ensures seamless workflow, approvals, and successful delivery.

EXPERTISE

ENGINEERING AND DESIGN

we provide a team of experts, engineers, and talented professionals with many years of experience in engineering and design for the industries and sectors that we serve. Here are some of the highlights of our team.

A team of talented professionals armed with the latest tools and technology, and extensive access to resources, makes up your consultancy division.

Experienced engineers are dedicated to each project to evaluate technical queries and propose solutions, determining the best roadmap in line with the client's requirements. This is followed by the creation of wiring diagrams and visual layouts for client approval.

Engineering Layouts

- Termination Layout
- Wiring Layout
- Schematic Layout
- Typical Installation

Engineering Documents

- Material Approval Requests
- Functional Design Specifications
- Detailed Design Specifications
- Method Statements

Our strength lies in our people. We bring together a dedicated team of experts, engineers, and seasoned professionals with extensive experience in engineering and design across the sectors we serve.

INSTALLATION & COMMISSIONING

We understand that successful project execution depends heavily on the quality of installation and commissioning. That's why we assign only the most experienced and highly qualified technicians to support these critical stages. Our team works hand in hand with project managers, engineers, and client representatives to ensure that each system is installed, tested, and commissioned with the highest level of precision and care.

From initial setup to final handover, our focus is on delivering seamless integration, minimizing downtime, and ensuring systems operate reliably from day one.

ATS TELECOM Installation & Commissioning Approach:

- **Tailored Execution Based on Client Specifications:**
Every installation begins with a deep understanding of project requirements and client goals. We strictly follow approved plans and specifications to ensure a custom-fit solution that aligns with the project's scope, schedule, and standards.

- **Rigorous Testing:**
Upon completion of installation, cable insulation and continuity tests are conducted—or witnessed on behalf of the client—to ensure system safety and integrity.

- **Power Connection Protocol:**
Connection to the main power supply is only made after all testing is successfully completed and verified.

- **Pre-Commissioning Inspection:**
Prior to commissioning, ATS requires the system panels to be powered for a comprehensive general inspection, including visual checks of all installed equipment, cabling, and wiring.

SYSTEM INTEGRATION

Our integration center is a centralized hub for seamless solution integration and assurance. With dedicated team of certified project managers and engineers, we deliver comprehensive solutions and integration services efficiently, even with limited timeand resources. Our experienced technicians work closely with project managers and engineers, ensuring smooth execution, timely deliver, and high-quality standards that exceed client expectation.

Integration Center & FAT Services

At ATS, we take pride in delivering specialized system integration services through our Integration Center and Integrated Factory Acceptance Testing (IFAT) facility, key assets trusted by clients across the energy, critical infrastructure, and government sectors. Staffed by certified project managers and engineers with deep industry knowledge, we ensure seamless solution integration, quality assurance, and rapid deployment.

Our Integration Center, certified to **ISO 9001:2015, ISO 14001:2015, and OHSAS 18001:2007 standards**, is equipped with cutting-edge technology to support the successful delivery of integration projects of any scale, on time and within budget.

Integrated Factory Acceptance Testing (FAT)

The IFAT process allows us to bring together key vendor components and client teams in one location to rigorously test and validate integrated control systems, networks, and security applications before final deployment.
With ATS, clients gain a reliable integration partner committed to delivering quality, precision, and peace of mind.

TRAINING AND EDUCATION

At ATS, we believe that empowering our clients with knowledge is key to project success. That's why we ensure all client teams receive the necessary training and education throughout every stage of the project. Our goal is to enable efficient workflows and long-term operational excellence.

OUR TRAINING AND EDUCATION SERVICES INCLUDE:

Comprehensive Technical Training: We provide in-depth technical and operational training for client engineers, technicians, and all personnel involved in project commissioning.

Clear & Consistent Communication: Our team maintains open lines of communication with client teams to ensure clarity, alignment, and effective knowledge transfer.

Proactive Knowledge Support: We actively monitor project developments and conduct research to identify areas where future training may be required, helping clients stay ahead of potential challenges.

> With ATS, clients receive more than just a solution, they gain a knowledgeable partner committed to their continuous success.

MAINTENANCE AND SUPPORT

ATS stand by the quality of our work and the reliability of the products we deliver. All our solutions are backed by manufacturers' warranties, and our team is always ready to assist clients with any warranty-related inquiries or follow-ups.

OUR COMMITMENT TO ONGOING SUPPORT INCLUDES:

• **Comprehensive Service Level Agreements (SLAs):**
We offer tailored SLAs to ensure system reliability, maximize uptime, and maintain continuous operational integrity throughout the lifecycle of the project.

• **7/24 Technical Assistance:**
Our expert support teams are available around the clock to respond to emergency call-outs, conduct repairs, and provide immediate assistance whenever needed.

• **Proactive Communication:**
We maintain regular contact with project stakeholders—providing daily or weekly updates based on project needs. From kickoff to completion, our team ensures full transparency and consistent progress tracking.

• **Industry Insight & Knowledge Sharing:**
As part of our support commitment, we stay up to date with the latest industry developments and trends, sharing relevant updates with our clients to enhance their operations and planning.

MAINTENANCE AND SUPPORT GO BEYOND TROUBLESHOOTING
We build strong, reliable partnerships focused on long-term success and peace of mind.

ADVISORY AND CONSULTANCY

Project Management & Client Innovation Centre (CIC)
Each project is managed by a dedicated project manager who ensures seamless workflow, approvals, and successful delivery. Our Client Innovation Centre (CIC) plays a key role in supporting this process with its expert-driven capabilities.

Key Services from CIC:

• **Bespoke Strategy Briefings:**
Led by a project manager, we align client goals with ATS solutions, ensuring clear communication and timely delivery.

• **Architectural Design:**
Our engineers provide optimized designs that are both functional and scalable, tailored to the client's needs.

• **Technology Roadmapping & Planning:**
Through careful research, we create a tailored technology roadmap to guide project execution efficiently and effectively.

• **Proof of Concept (POC):**
A dedicated team tests and validates the POC to ensure the solution meets client expectations before full deployment.
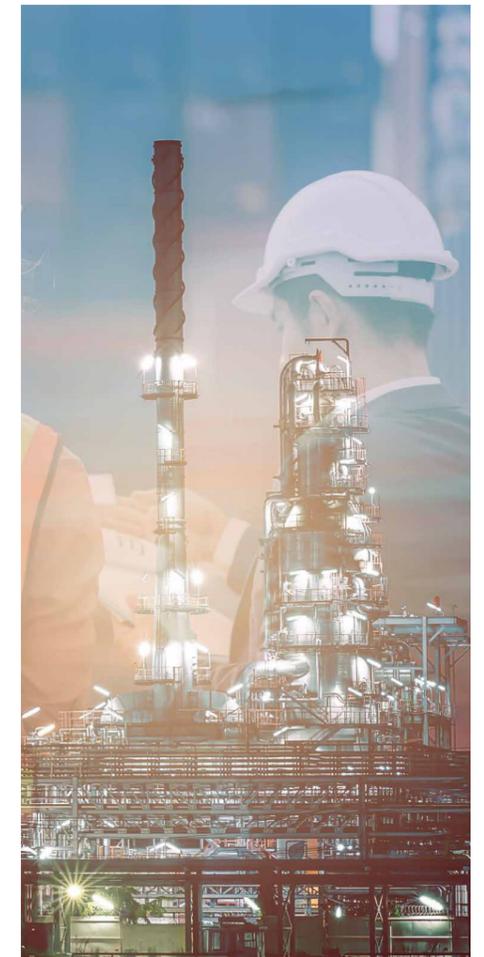

With the **Client Innovation Centre**, ATS combines expertise, innovation, and collaboration to provide comprehensive project management solutions that deliver seamless, high-quality results. From initial strategy to final delivery, we are committed to making every project a success, with unmatched support and guidance throughout the journey.

SOLUTIONS

Since 2003, ATS has grown from a specialized telecom contractor into a leading provider of networking, cybersecurity, and smart infrastructure solutions. We integrate technology seamlessly, ensuring secure, scalable, and future-ready systems that empower businesses to stay connected, protected, and ahead of emerging threats.

OT/IT NETWORKING & SECURITY

We provide network infrastructure, IT solutions, structured cabling, and cybersecurity, ensuring secure, scalable, and integrated technology for various industries.
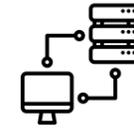

AUDIO-VISUAL COLLABORATION

We enhance corporate communication with scalable AV solutions, PABX/IP PBX systems, and digital signage, ensuring seamless connectivity and future-ready operations.

PHYSICAL SECURITY AND SAFETY

We deliver multi-layered physical security solutions that protect assets, networks, and personnel, ensuring compliance, efficiency, and resilience against evolving threats.

YOUR TRUSTED PARTNER IN TELECOM SYSTEMS SOLUTIONS

Through strategic collaborations with vendors and a team of skilled, certified network engineers and technicians, we excel in delivering sophisticated network systems architecture and economical solutions.

NETWORKING

We provide an extensive range of network infrastructure, hardware, and software solutions, customizing them to meet the specific requirements of businesses and industries.

Our offerings include the supply and installation of structured cabling across various types and standards, as well as a Hybrid IT approach that integrates in-house IT resources with cloud-based services in collaboration with CISCO.

In addition to delivering these essential solutions, we create personalized plans for network and data security, ensuring the detection and response to potential risks and cyber-attacks. We work across multiple industry sectors and tailor-made technology solutions for the energy, defense, government sectors, and smart cities.

WIRED AND WIRELESS

We actively monitor project developments and conduct research to identify areas where future training may be required, helping clients stay ahead of potential challenges.

STRUCTURED CABLING

we meet clients' needs for cabling supply and installation for virtually every type and standard. We have executed projects for more than 20,000 outlets, with complete cabling for headquarters, onshore/offshore plants, and remote locations.

NETWORK SECURITY

ATS provides real-time threat monitoring, risk assessment, and automated compliance solutions for both IT and OT environments, safeguarding critical infrastructure and ensuring regulatory alignment.

NETWORKING SOLUTIONS

☑ Wired And Wireless

ATS designs, builds, and maintains reliable LAN and WAN solutions that support both your current operations and future growth. Using high-quality components from leading international vendors, our networks are cost-effective, scalable, and tailored to your business processes and workflows.

By implementing the right infrastructure, we help streamline communication and data transfer, empowering your team with faster, more efficient connectivity to drive productivity and operational efficiency.

When ATS builds network solutions, customers can be confident in:

- Accurate project planning and cost estimates
- The optimal combination of vendor products
- Reliable delivery timelines
- Robust project management systems to monitor progress and handle changes
- Minimal disruption to daily operations

LAN Solutions

- LAN design, installation, and support
- Network migrations and upgrades
- Optimized LAN performance and reliability
- Robust project management for tracking and change control
- Wireless network design, installation, and ongoing support

WAN Solutions

- Router recommendation, supply, and installation
- Link and network hardware monitoring
- Network hardware and operating system upgrades
- Network performance reporting
- Performance optimization
- Network security services
- Voice over IP (VoIP) solutions
- IP addressing and configuration
- Virtual Private Networks (VPNs)

☑ Structured Cabling

ATS, in partnership with AMP Connect and Tyco, delivers comprehensive cabling supply and installation services that meet virtually every type and standard. We've successfully executed large-scale projects, including the installation of over 10,000 dual points, covering both headquarters and remote facilities.

We start by evaluating your unique cabling requirements and proceed with tailored installations designed to fit your operational environment and business goals.

Installation Highlights

- Certified, experienced, and industry-trained installation teams
- 7/24 phone and on-site technical support
- Critical issue escalation processes
- Comprehensive printed test results upon project completion
- Flexible scheduling to align with your operations and minimize disruption

We prioritize precision and reliability by thoroughly testing and certifying every system before commissioning, using industry-standard diagnostic tools, and documenting each line's performance. Our team ensures your site is clean, organized, and ready for use. Beyond installation, we provide ongoing support through comprehensive Service Level Agreements (SLAs), offering routine and emergency maintenance, including after-hours and weekend services.

Key Benefits

- Certified expertise across all relevant product lines and job types
- Optimized delivery timelines with on-time project completion
- Secure, safe installation practices that protect your facility
- Transparent progress tracking and milestone reporting
- Structured change control processes to minimize disruptions
- Post-installation warranty and support
- Maintenance and repairs handled by certified professionals under SLAs

Cable Types and Standards

- Unshielded twisted pair (Category 3, 5, 5 Enhanced, 6, and Gigabit cabling)

- Shielded twisted pair (Category 3, 5, 5 Enhanced, 6, 6A 7 & 10 Gigabit Cabling)

- Multi-mode OM2,OM3,OM3+ & OM4 Fibre Optic (Aerial, Underground, in/outdoor, Field Termination, (ST, SC, LC, & MTRJ), (fusion and mechanical Splicing)

- Single-mode fibre optic (aerial, underground, in/outdoor, field termination, (ST, SC,LC, and MTRJ), (fusion and mechanical splicing)

- Coaxial
- Video
- CATV

- Twinax cable
- CCTV

OT/IT Network Security

We provide robust network security solutions that offer granular access control, real-time monitoring, and advanced threat detection. Our comprehensive approach safeguards your organization's digital assets from unauthorized access, malware, and data breaches.

ATS helps you build a resilient security framework that keeps your network protected against ever-evolving cyber risks.

We start by evaluating your unique cabling requirements and proceed with tailored installations designed to fit your operational environment and business goals.

Our Network Security Services:

- Next-Generation Firewalls (NGFW)
- Intrusion Prevention Systems (IPS)
- Network Behaviour Analysis
- Network Access Control(NAC)

- Email Security Gateways
- Web Security Gateways
- Content Analysis & Sandboxing

ADVANCED SECURITY FOR OT ENVIRONMENTS

we secure industrial networks by implementing segmentation, asset visibility, and protocol-aware threat detection.
Our solutions ensure the integrity and availability of critical control systems while aligning with **IEC 62443, NIST, and NCA standards.**

OT/ICS Security Capabilities

- Industrial Network Segmentation
- Secure Remote Access for OT
- OT Asset Discovery & Visibility
- Protocol-Specific Threat Detection
- Anomaly Detection & Incident Response
- Compliance Mapping

AUDIO-VISUAL COLLABORATION

To maintain a competitive edge and stay in line with evolving technologies, companies must adopt a cutting-edge collaborative audio-visual system supported by the latest advancements in modern technology. This ensures long-term sustainability and facilitates ongoing adaptation to technological changes.

We can assist in the choice, integration, and management of state-of-the-art communication and audio-visual collaboration solutions plus post-implementation support. We are ready to work closely with you to guide and advise you on the installation or upgrade of your corporate AV systems and ensure you are investing in systems that meet your needs with longevity in mind.

We work across multiple industry sectors and tailor-made technology solutions for the energy, defense, government sectors, and smart cities.

UNIFIED COMMUNICATION   **AUDIO-VISUAL INTEGRATION**   **IP TV AND DIGITAL SIGNAGE**

Collaborating closely with essential strategic partners, we design and deliver advanced audio-visual systems that integrate cutting-edge technology to meet diverse business needs.

Our solutions are tailored to optimize communication, boost productivity, and support seamless collaboration across your organization.
By combining cost-effectiveness with high performance, we help to create efficient environments, whether in boardrooms, training centers, or control rooms, ensuring long-term competitiveness and adaptability in an ever-evolving market landscape.

AUDIO-VISUAL SOLUTIONS

✓ Unified Communications

ATS provides scalable PABX and IP PBX systems tailored for both small and large organizations, integrating technologies from Cisco Systems and other leading vendors.

Our unified communications solutions help public and private sector clients streamline information delivery and collaboration. With a clear, client-focused methodology, we ensure transparency, incorporate changes smoothly, and keep you fully informed from start to finish.

ATS provides real-time threat monitoring, risk assessment, and automated compliance solutions for both IT and OT environments, safeguarding critical infrastructure and ensuring regulatory alignment.

ATS ENSURES CUSTOMER SATISFACTION IN UNIFIED COMMUNICATIONS THROUGH:

- Comprehensive assessment and tailored solution design
- Professional project management for smooth execution
- Onsite installation and commissioning by certified experts
- Transparent progress reporting at every stage
- Minimal downtime and disruption to business operations

✓ Audio-Visual Integration

ATS offers advanced audio-visual integration services that blend the latest technology with expert design to enhance communication and collaboration. Whether you're upgrading existing systems or installing new ones, our tailored solutions help you stay ahead in a competitive market.

We serve a range of environments, from meeting rooms to large auditoriums, delivering seamless, high-performance AV experiences. With ongoing support and maintenance, we ensure your systems remain reliable and up to date.

Our AV Capabilities

- Video conferencing and telepresence systems
- Interactive displays and smart boards
- Digital signage and video walls
- Sound systems and acoustic design
- Control systems and automation
- Lighting integration for presentations

We proudly deliver audio-visual solutions across a wide range of industries, tailoring each project to meet the unique demands of the environment.

Our expertise allows us to create versatile, high-impact systems that support communication, collaboration, and productivity.

Our End-to-End AV Integration Process

- Consultation & Needs Assessment
- System Design & Planning
- Installation & Configuration
- Testing & User Training
- Ongoing Support & Upgrades
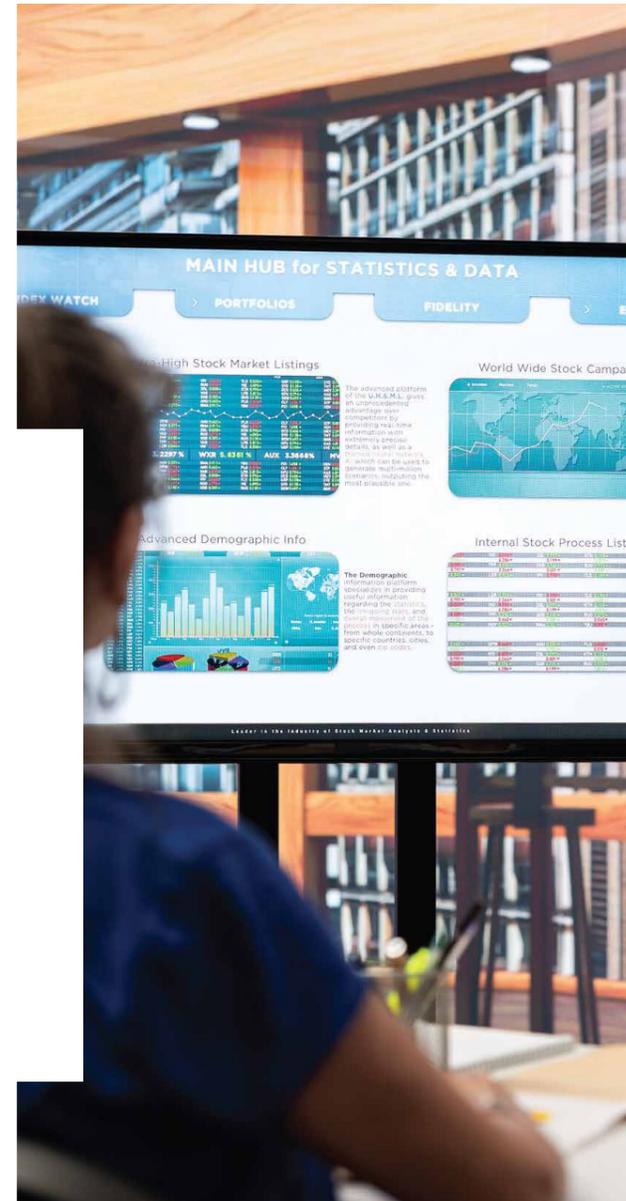

WE LEVERAGE THE LATEST TECHNOLOGIES TO UPGRADE YOUR AUDIO-VISUAL SYSTEMS WITH INNOVATIVE DESIGN, EXPERT IMPLEMENTATION, AND RELIABLE SUPPORT

☑ IP TV and Digital Signage

ATS delivers high-quality IP TV and video distribution systems that operate over your existing network infrastructure, bringing seamless communication, entertainment, and video-based training to even the most remote locations.

Our solutions ensure your team stays connected and updated with critical internal communications, whether for offshore platforms, critical infrastructure, or other facilities.

In collaboration with global leaders in IP TV technology, we offer scalable and future-ready systems built for both onshore and offshore environments. Our platforms are easy to install, user-friendly, and designed for long-term performance.

With targeted content delivery, you can broadcast tailored messages to specific individuals or teams, ensuring timely and relevant communication across your entire organization.

EFFICIENT COMMUNICATION THROUGH IP TV INNOVATION

☑
- **High-Quality Content Delivery:**
  Streamline internal communications with high-definition video and TV across your network.

☑
- **Future-Proof Systems:**
  Built with Exterity technology to ensure longevity and scalability.

☑
- **Remote Location Friendly:**
  Optimized for use in offshore oil rigs, mining sites, and other remote facilities.

☑
- **Easy Setup and Use:**
  Simple implementation and intuitive user interfaces for seamless integration.

☑
- **Targeted Content Delivery:**
  Personalize content distribution down to the user or group level to meet specific needs.

PHYSICAL SECURITY & SAFETY

ATS delivers tailored physical security solutions designed to meet the unique needs of your organization. From initial planning to ongoing system management, we provide end-to-end support that balances effectiveness, cost-efficiency, and compliance with health, safety, and ethical standards. Our approach ensures comprehensive protection of your assets while respecting aesthetics, human rights, and societal norms.

By integrating insights from ICS/OT inventories, network diagrams, and data flow maps, we build a clear understanding of your operational environment. This insight forms the foundation of your physical security strategy and strengthens your overall risk management.

SURVEILLANCE
We can provide the latest CCTV technology solutions, providing your company with round-the-clock facility surveillance with our expertise and the leading CCTV equipment manufacturers.

ACCESS CONTROL
With modern access control technology from ATS, the workspace and surrounding areas of any organization are fully protected, providing a secure haven while conducting business for all clients and employees.

PUBLIC ANNOUNCEMENT
We provide customized PA and alarm systems for a variety of areas, locations, and needs, and custom-made solutions for your business.

PHYSICAL SECURITY SOLUTIONS

☑ Surveillance

ATS delivers cutting-edge CCTV surveillance systems designed to provide your organization with constant, reliable security. Backed by our partnerships with leading manufacturers and years of expertise, our solutions are tailored to meet the specific needs of your facilities, helping you protect assets, monitor operations, and respond to threats with confidence.

From initial consultation to seamless installation and ongoing support, ATS ensures every step of your surveillance strategy is built for long-term effectiveness and peace of mind.

With ATS surveillance solutions in place, you can stay focused on running your business, knowing your people and property are protected by industry-leading technology and trusted expertise.

- Round-the-Clock Monitoring
- Tailored System Design
- Top-Tier Technology
- Operational Efficiency
- Proactive Threat Management
- Scalable and Flexible
- End-to-End Support

☑ Access Control

ATS delivers intelligent, customizable access control systems designed to secure your premises while ensuring smooth daily operations. We help you safeguard people, assets, and infrastructure by controlling who enters your spaces and when. With scalable solutions tailored to your needs, we make managing employee access and visitor flow effortless and secure.

Our access control systems go beyond doors and gates, they create a complete security ecosystem with integrated monitoring, real-time alerts, and easy user management.

With ATS, you gain peace of mind knowing your access control is backed by robust technology, thoughtful design, and expert implementation, ensuring your people and operations remain safe and uninterrupted.
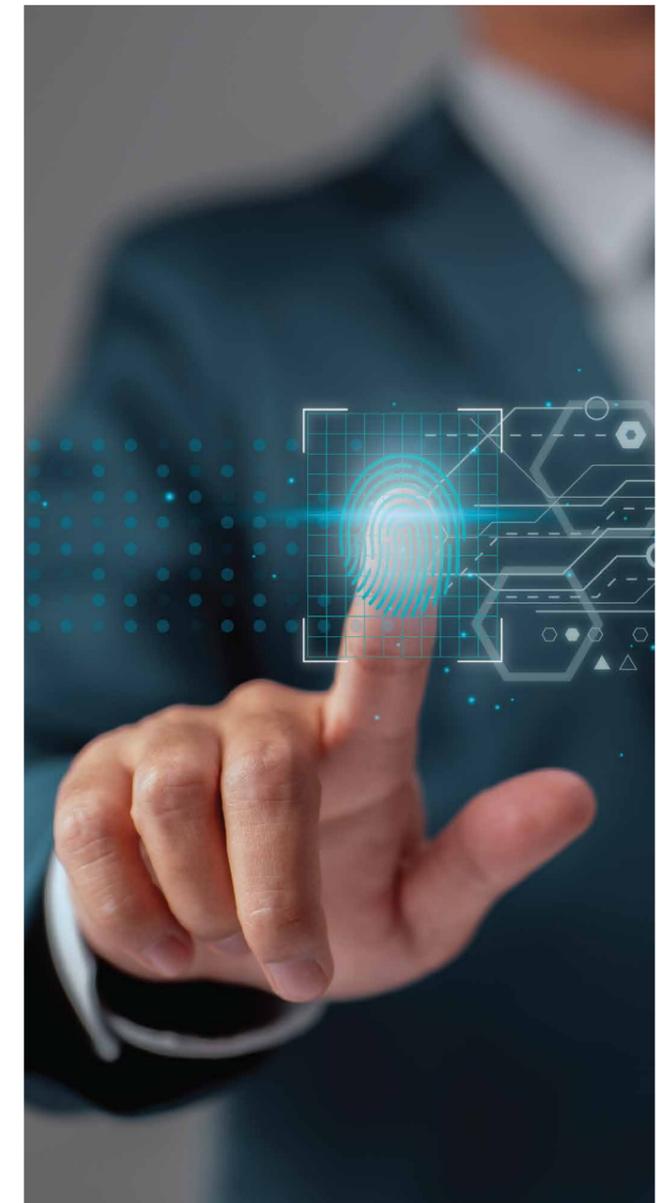

PERSONAL LOCATION AND MUSTERING SYSTEMS

ATS provides advanced personal location and mustering systems to help organizations monitor personnel in real-time and respond quickly in emergencies.
These solutions ensure accurate tracking, faster evacuations, and complete accountability, making them essential for high-risk or large-scale environments.
Integrated with access control and safety protocols, they enhance overall security and protect your most valuable asset—your people.

✔ Public Address Systems

At ATS, we design and deliver efficient, tailored Public Announcement (PA) and alarm systems that ensure your teams are always informed and connected. Whether it's a corporate environment, industrial facility, or remote site, our solutions are crafted to meet the unique communication needs of your business.

From daily announcements to emergency alerts, our systems provide reliable and intelligible messaging across all zones of your operation, keeping safety, clarity, and responsiveness at the core.

Our Public Announcement systems are engineered to deliver precise, reliable communication across your facility. Whether it's daily updates, targeted messaging, or emergency alerts, ATS provides smart, scalable solutions tailored to your environment and operational needs.

RELIABLE PUBLIC ANNOUNCEMENT SYSTEMS
SYSTEM DESIGN AND OPERATIONAL FEATURES

✔ • **Zonal Announcements:**
Target messages to specific areas or departments for better coordination.

✔ • **Scheduled Messaging**
Automate announcements with pre-recorded content for recurring updates.

✔ • **Emergency Alert Capability**
Fast, clear alerts during critical situations to ensure safety and compliance.

✔ • **Seamless Integration**
Fully compatible with your existing communication and alarm systems.

✔ • **End-to-End Support**
We handle everything from design and installation to maintenance and upgrades.

OUR INTEGRATED SOLUTIONS PORTFOLIO

At ATS, we provide end-to-end technology solutions across three core areas: Networking Infrastructure, Audio-Visual Collaboration, and Physical Security & Safety. From high-performance networks to advanced AV systems and intelligent security, our expert team delivers scalable solutions tailored to your operational needs.

We serve diverse sectors including Critical Infrastructure, Energy & Utilities, Oil & Gas, Manufacturing, Government & Defense, and Telecommunications. With deep industry insight, we ensure seamless integration, compliance with sector standards, and long-term value. Whether supporting digital transformation or securing vital assets, ATS is your trusted partner for connected, collaborative, and secure operations.

NETWORKING INFRASTRUCTURE

Build a strong digital foundation with seamless connectivity and reliable data security.

Wired & wireless connectivity, structured cabling, and advanced network security for reliable digital operations.

AUDIO-VISUAL COLLABORATION

Create immersive and efficient communication environments across all workspaces.

Unified communication, immersive AV integration, and IPTV/digital signage for seamless interaction and engagement.

PHYSICAL SECURITY & SAFETY

Safeguard your people, property, and assets with intelligent safety systems.

CCTV surveillance, access control systems, and public announcement solutions to secure and protect your organization.
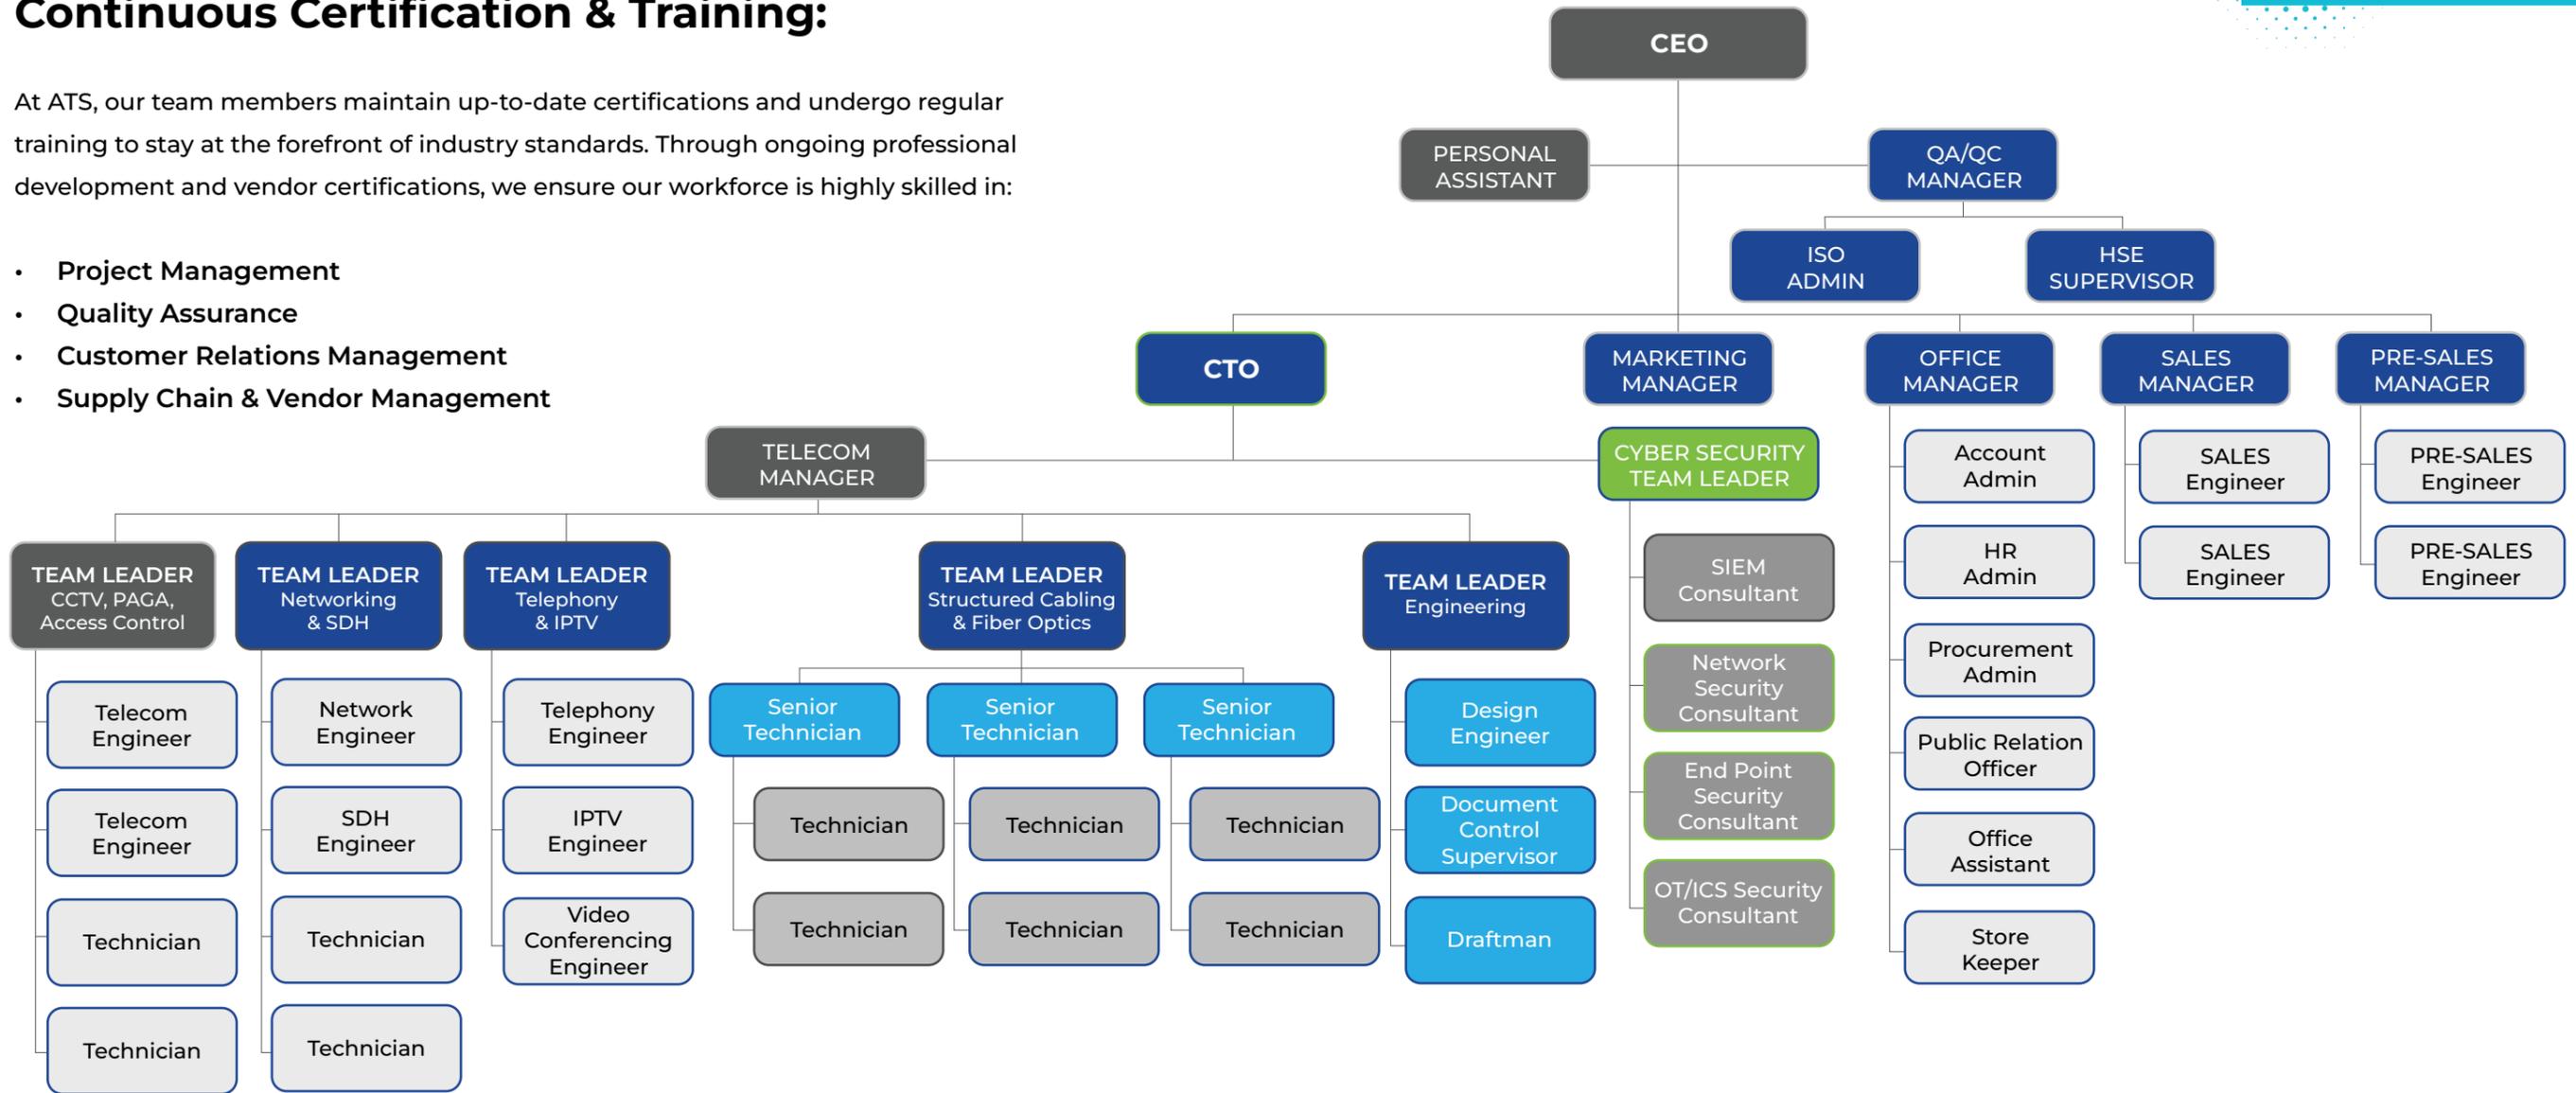

RESOURCES & FACILITIES

Continuous Certification & Training:

At ATS, our team members maintain up-to-date certifications and undergo regular training to stay at the forefront of industry standards. Through ongoing professional development and vendor certifications, we ensure our workforce is highly skilled in:

ATS operates a well-maintained 400-square-meter warehouse and a highly-secured, 200-square-meter Integration Center in Abu Dhabi for Factory Acceptance Testing (FAT) services. Our state-of-the-art IT infrastructure, up-to-date application software, and reliable vehicles, equipment, and resources ensure seamless and efficient project execution. These facilities are designed to support high-quality services, ensuring security, performance, and reliability at every stage of the process.

ORGANIZATION CHART

PROJECTS & REFERENCES

"

Our portfolio reflects successful projects across industries, showcasing our expertise in delivering tailored telecom, networking, and cybersecurity solutions.

The following highlights represent a selection of our completed projects.

- TAAZIZ
- NMDC-HULRK
- New Workshop Buhasa
- Satah Al Razboot (SARB) Field Dev. Project EPC Work for Zirkuh Island Accommodation Complex & Admin Bldg. (PKG-2)
- 250 Accommodation for Contractor Staff at Asab-0
- Asab Phase-1 Main Control Building Project
- Remodeling of Old Administration Bdlg. At Buhasa
- New Management Building Additional Offices
- Gasco New Lab Habshan
- Gasco-EPC Fire Training Center Asab Plant
- New Management Building and New Auditorium Building, Buhasa.
- New Asab Accom Complex Phase III
- Habshan 5 Industrial Facilities Project
- Gasco Ruwais 4th NGL Train Project.
- Al Sahail Accommodation – Das Island.
- AL NASR FIELD EPC 1 & 2
- Maintenance of CCTV in Ruwais City for ADNOC - Part B - CCTV Scope.

CERTIFICATIONS & COMPLIANCE

ATS works in multidisciplinary teams, supported by a wide range of certifications.

27001 ISO 2013   14001 ISO 2015   9001 ISO 2015   45001 ISO 2018

We are certified and authorized to trade, install, and maintain telecommunication systems, digital infrastructure, and OT/IT cybersecurity solutions.

Our services support numerous government and non-government entities, including those in critical infrastructure sectors.
